Experience

Reachin | Full-stack Developer   Apr 2023 - Present

Designed and developed a hybrid mobile application for iOS and Android using Ionic Framework with Javascript and Vue.

Built a backend API Server and database using PHP and Laravel for the Reachin mobile application.

Developed a web application for overseeing business operations using Laravel with Inertia and Vue.js.

Designed and developed a landing page and blog for the business, integrating Storyblok as the content management system.

Brickhunter | Full-stack Developer   Mar 2022 - Jan 2024

Designed a new UI with Figma and developed the front end with Laravel, Livewire, Alpine and Vue.

Implemented storyblok as the content management system and completely reworked the blogging system.

Updated Laravel codebase to a more scalable and up-to-date state and built various new features for the e-commerce platform and business management CRM.

Universal Packing Specialists | Front-end Developer   Mar 2020 - Feb 2022

Designed and developed a single-page web application, handling various business operations such as CRM, Invoice creation and printing, order and delivery tracking and many more.

Developed an in-app messaging system and Front Addon, empowering our team with more efficient email and in-business communication tools.

Developed a mobile application for couriers to easily track and manage their delivery with Vue and Cordova.

UI Bears | Co-Founder / Web Developer   Oct 2018 - Oct 2020

Co-created a business with the goal of creating and publishing high-quality UI/UX products for both designers and developers.

Developed a digital product named Krom Wireframe Kit, a powerful tool based on the Atomic Design System, designed to significantly enhance the speed and quality of wireframe processes for UI/UX designers.

Developed detailed front-end UI Libraries for both Vue and React.

Okami Creative | Founder / Web Developer   Sep 2016 - Sep 2019

Formed a digital agency business focusing on creating interactive and engaging business applications. Worked on a diverse range of projects, including e-commerce platforms, landing pages, and mobile applications.

Created and developed a web and mobile application for valet parking businesses to easily track customers and business metrics.
